

# 2023-2024 Exam References

The reference list below represents the materials used to support exam items during the March 2023 to February 2024 exam year, as determined by the subject matter experts of the BOC Exam Development Committee (EDC). Every item is referenced twice to ensure a consensus exists on each item. Please note that a specific “edition” and “year” for each reference is not included in the list for the purpose of simplification. During the exam development process, the BOC uses the most current edition of a reference when constructing items.
