

Education Gap Assessment for BASRaT

Process: The International Arrangement (IA) organizations, in collaboration with International Consultants of Delaware (ICD), participated in an analysis of education and credentialing standards. The IA organizations, via cooperation and collaboration, established minimum educational standards for the IA.

Use: ICD will conduct a credentials evaluation that will assess if an applicant has bridged the identified education gaps through a detailed analysis of academic courses, syllabi, continuing professional education, and other related activities that describe the applicant's cumulative knowledge, abilities, behavior, and expertise.

Summary of Jurisdictional Gaps:

- Gaps may require remediation (to be determined by BASRaT).
- Key Decision: Education gaps of a jurisdictional nature or required a specific First Responder Course, were deemed present for all International Arrangement organizations.
- Visit the [BASRaT website](#) for more information about how applicants bridge gaps.

Gap	Gap Found in Comparison to:
A description of the use of exercise as a treatment modality to improve the health of members of the public in line with local government provisions and initiatives.	CATA
A description of the ethical and moral requirements of research, including reference to the BASRaT professional documentation.	CATA
